

CUHK Convocation Study Improvement Awards 2016/17
香港中文大學校友評議會學業進步獎 2016/17

Name 姓名	Li Ka Kit
Major 主修	Computer Engineering

It is a great pleasure for me to be granted the CUHK Convocation Study Improvement Awards. I would like to express my deep gratitude to the CUHK Convocation.

Studying in university is never easy. I was once having a hard time with my studies. The major courses in computer engineering seems to be challenging for me, and my performance was not satisfactory. I was a bit disappointed with myself. However, there were many people who supported me. My friends and my family listened to my problem, and encouraged me to do better. My advisor gave me some useful advice, which helped my study a lot. The professors and tutors were patient to answer my questions. I would like to thank all of them for supporting me. After that, my studies improved significantly, which boosted my confident greatly.

During this period of time, I experienced some feeling about studying. I once put too much pressure on myself and questioned my ability, which depressed me for some time. I was not able to improve at that time. Afterwards, I tried to take it easier and not to push myself too hard. I went cycling and hiking when I was free. I played the piano and read my favorite books. I then felt relaxed and relieved, and I was more energetic to deal with my studies. I found that it is more comfortable for me to improve with lower pressure.

This award means a lot to me, not only because it helped alleviate my financial burden, but also encourages me to do even better, and boosts my confidence so much. At last, I would like to thank the CUHK Convocation again, and I hope I can help others who are in need in the future.

I joined the archery class and had a fun time!

I participated in the college rope jumping competition and won the champion!
