Major 主修	Translation 翻譯
--------------------	-------------------

First and foremost, I would like to express my gratitude to CUHK Convocation for granting me the award in recognition to my campus services. In the year of 2015, I was honoured to be elected as the president of the Student Union of United College (UCSU). During my term of service, I was involved in discussions related to policies of the college and CUHK. Along with the roles of student representative of the Senate (CUHK) and the Representative Council of CUSU, I was given an opportunity to serve for the students, the college and the University.

Being the president of UCSU, I regarded myself as a servant for students from United College. With the help of my colleagues, the opinions of students were collected and reflected to the authorities. While ensuring the voices of students are heard and safeguarding the rights and benefits of students, cooperation between the college and us is important. Therefore, a smooth communication is needed. To students, I listened to them actively; to authorities, I illustrated the arguing point clearly and sought for a successful consensus. By understanding the operation of the university, I was inspired on servicing others by improving and enhancing policies of the campus, as well-made policies can create an ideal environment to students, teachers and the administration.

Apart from being involved in policy-making, basic services were also provided to students by UCSU. Every day, we welcomed enquires from students on issues related to booking of promotional places and facilities. Working collaboratively with each other, members from UCSU and I tried our best to answer students' questions and to solve their problems. This enabled me to develop effective communication skills to others.

As a student senator of CUHK, I was a member the Senate Committee on Teaching and Learning, which I shared my thoughts with the University on enhancing the teaching and learning environment and quality. I enjoyed the role very much, as I could seize the opportunity to exchange students' ideas with the professors. To prepare for the meetings, I often asked for students' opinions in order to grasp a more comprehensive picture on the issues.

Also, I was the student representative from United College in the Representative Council of CUSU. In the Council, plenty of student affairs are needed to be dealt with and I chose to join the Affiliated Clubs and Societies Resources Allocation Committee. This year, my duty is to help to allocate rooms for affiliated clubs and societies in CUHK. The process took a lot of time but it is worth to do so for the students.

The above campus services provided me a wider horizon on the operation of the school and the meanings and methods of serving the others. The end of my term of service in UCSU is not the end of my servicing life. I am still taking up other servicing roles in the University and the community, and to rejoice in serving the others.
